# **ABRA IGNITER & ABRA FUSE (Visco) Information**

10 Temmuz 2024

**Subject: Information on the Completion of the Production and R&D Processes of ABRA IGNITER and ABRA FUSE (Visco) Rocket Engine Igniters**

Dear Users

As ABRA Space, we are pleased to share with you our latest innovations in the field of rocket engine igniters. The production and R&D processes of our ABRA IGNITER and ABRA FUSE (Visco) rocket engine igniters have been successfully completed and we would like to inform you that these products can be used safely and effectively for all your rocket engines.

The development process of ABRA IGNITER and ABRA FUSE (Visco) products started with a rigorous R&D work and during this process, continuous tests and improvements were made to maximise the performance and safety standards of our products. These igniters are capable of safely firing a wide range of rocket motors from 18mm to 98mm.

**ABRA IGNITER** is designed to provide high precision and reliable firing performance. The materials and technologies used in the manufacturing process guarantee that the igniter ignites the rocket engine quickly and safely. The durability and reliability of our igniter has been verified by extensive testing under various conditions. This ensures that our users get a safe and consistent performance in every flight.

**ABRA FUSE (Visco)** offers a modern approach to traditional ignition methods. Visco fuses offer a safe and easy ignition method, especially for hobby rocketry and amateur rocket motors. Quality and safety are kept at the highest level in our production processes, and it is guaranteed that each wick is produced and tested in accordance with the standards. The ignition time and burning rate of ABRA FUSE (Visco) wicks have been optimised for safe engine ignition.

During the development of these new products, our R&D team has worked meticulously to ensure compliance with high safety standards. The quality control measures implemented during the manufacturing process ensure that each igniter delivers consistently high performance.

The successful completion of the ABRA IGNITER and ABRA FUSE (Visco) igniters is a testament to ABRA Space's commitment to innovation and quality. You can contact our technical team for detailed information and support on the use of these products. Customer satisfaction and safety are our top priorities and that is why we are here to ensure that our products always meet the highest quality and safety standards.

As ABRA Space, we attach great importance to the feedback of our valued users. We would like to state that we would welcome any questions, suggestions or feedback you may have regarding our new products. We wish you safe and successful flights with our ABRA IGNITER and ABRA FUSE (Visco) igniters.

Best regards,

**ABRA SPACE LTD.**
